Email: [abdulmanafpfasal@gmail.com](mailto:abdulmanafpfasal@gmail.com)

Dear Hiring Manager,

I am writing to express my interest in the software developer position at your company. As a seasoned software developer with experience in e-commerce and school management projects, I am confident that I would make a valuable contribution to your team.

My expertise in Flutter and Node.js has allowed me to develop innovative and user-friendly applications that meet the needs of a diverse range of clients. My ability to work effectively in a fast-paced environment and my strong problem-solving skills have consistently enabled me to deliver projects on time and within budget.

I have a passion for software development and stay up-to-date with the latest advancements in the field to continuously improve my skills. I am a team player and enjoy collaborating with others to achieve common goals. I am confident that my technical skills and experience, combined with my strong work ethic, would make me an asset to your team.

I would welcome the opportunity to discuss my qualifications further and am available for an interview at your convenience. Thank you for considering my application.

Sincerely,

Abdul Manaf P Fassal

- ❖ **My community | Mobile Application**  
Framework: Flutter, Language: Dart, Version Control: Git  
"My Community" is an app that helps you find services, properties, vehicles, jobs, and malls in Qatar. It allows you to search for shops inside malls and discover the best deals in the country. The app also provides a platform for you to post your requirements and communicate with others through messaging. With its comprehensive features, "My Community" is the ultimate solution for finding what you need in Qatar.
- ❖ **Healthbae | Mobile Application**  
Framework: Flutter, Language: Dart, Version Control: Git  
An Ecommerce Application.
- ❖ **Chat Server | Web**  
Technology used: Nodejs, Socket.io, Language: JavaScript, Database: PostgreSQL, , Version Control: Git  
A chat server built with Node.js and Socket.IO provides real-time communication between clients. The server listens for incoming connections and creates a unique socket for each client. When a client sends a message, it is broadcasted to all connected clients through an event emitted from the server. The chat

server also handles authentication and can store messages in a database for persistence. This chat server provides fast, efficient, and reliable real-time communication and collaboration between users.

## PERSONAL PROJECTS
